## GLASS TEAPOT WITH WOODEN LID

OGATA

### ORIGIN

Japan

### DIMENSIONS

7.5" W (with handle)  
5.25" dia x 7" H

### MATERIAL

Glass, cedar

### DESCRIPTION

Unassuming yet provocative, the heat-resistant glass teapot has an integrated sieve and sugi-cedar lid. Designed to invite the viewer to watch the transformation of loose or bagged tea as it steeps, it echoes ancestral Japanese craft traditions and draws the user closer to the communal ritual of tea service.

Due to the handmade nature of this product, slight variations are to be expected.

### CARE

To use, pour hot or boiling water into the teapot for steeping. Do not place the teapot onto a burner or over a flame.

To clean, rinse with water using a soft sponge or dish cloth. Do not use household cleansers, abrasive cleansers, or metallic sponges.

### In addition:

Do not use in a conventional oven, microwave, or induction cooker.

Avoid shocks and rubbing, because the glass is not tempered. If a crack appears, discontinue use.
